SUBJECT MATTER EXPERTS

We provide the subject matter resources and expertise to help you take your critical projects to a successful completion. Our third party services are unbiased...we are indeed "the owner's advocate for project controls." And we're more than just keyboard jockeys proficient in programs such as Oracle's® Primavera™, Track™, SAP® and more. We have hands-on field experience. When you combine real life with real time you get "the real deal"—when and where you need it.

Put a stop to the internal politics that can plague your projects. We are independent from your contractors, engineering firms and business sectors, which enables us to provide totally impartial and unbiased services. We always act with your best interest in mind.

SUBJECT

PROJECT CONTROLS RESOURCES

We provide the most skilled and highly qualified people to augment your project management staff during projects and turnarounds. Each of our specialists is armed with the latest and greatest technology and software, but can also offer any backwards-compatible information you require. We fit into your team by adopting your methods, procedures and processes. Contact us when you need:

- Project Controls Managers
- Field Planners
- Schedulers
- Cost Engineers/Accountants
- Contract Administrators
- Cost Control Analysts
- Execution Coordinators
- Documents Controls
- Developers/Programmers
- Procurement/Material Coordinators
- Technical Administrators
- Timekeepers/Track Administrators
- Clerical Staff

MATTER

PLANNING & SCHEDULING SERVICES

Our planners and schedulers realize that constantly analyzing the critical path is just as important as maintaining and updating the schedule. Proper planning and scheduling for these complex activities can reduce project duration and cost as they increase safety, quality and reliability.

Calculated Controls specialists are well versed in all applicable software including Primavera and, because of their own field experience, fully understand the advantage of properly estimating activities, sequencing the work and utilizing manpower efficiently.

- Scope Development
- Project and Portfolio Scheduling
- Detailed Estimating and Scheduling
- Bid Package Preparation
- Cost Control and Reporting
- Job/Field Planning
- Change Control and FCOs
- Earned Value Analysis
- Critical Path Analysis and Metrics
- Material Takeoffs
- Logistics and Constructability
- Contractor Selection/Tendering

EXPERTS

CUSTOM CONTROLS SOLUTIONS

Our customized cloud-based business solutions are tailored to your industry and your specific needs. We don't use templates or cookie-cutter solutions. We create, design and implement solutions that help you easily turn data into information that will assist you in your decision making—information so readily available that you can plan, execute and forecast better and faster. Imagine tracking any change to any record so that you can see who changed what and when, and then being able to see previous value—and that's but one example of the many features we can build into your custom cloud-based solution.

Our customized solutions:

- Align with Your Business Model
- Offer Easy "Google™-like" Search Capabilities
- Contain Real-time Reporting
- Provide Automated Information Delivery and Notifications
- Contain One-click Collaboration/Sharing
- Offers CRM ERP or Other Solutions
- Are Cloud-based and Easily Scalable
- Are Secure and Reliable
- Provide User-configurable Dashboards
- Provide Automated Information Delivery
- Decrease Repetition and Enforces Processes
- Utilize User Permissions and Roles-based Access
